SKILLS

- Full-Stack Web Development
- React
- Node .js
- Flutter
- AI- Driven Automation
- Java Application
- Object Oriented Concept (OOP)
- System Designing

PROFILE

Software Engineer with experience at Freelancer since 2024, known for developing innovative solutions. Achievements include first place at the Sona PHP Web Hackathon for creating a service management system, and second place at an IoT Hackathon for designing a spider robot. Expertise in full-stack web development using React and Node.js, as well as mobile apps with Flutter and Dart. Skilled in IT infrastructure, network configuration, and AI-driven automation. Aiming to contribute to a forward-thinking organization, utilizing a broad skill set to tackle complex challenges and deliver impactful results.

EMPLOYMENT HISTORY

Software Engineer, Freelancer

Jul 2024 — Present

Focuses on developing innovative software solutions tailored to client needs, employing a range of programming languages and tools. The role involves end-to-end project management, from initial design and coding to final deployment. Collaborates closely with clients to ensure alignment with their expectations and adapts to varying project requirements and technologies.

Computer Technician

Western Province, Colombo

Jan 2025 — Present

Provide hands-on IT support, hardware repair and system configuration across Western Province; diagnose and resolve hardware and software issues, perform OS installations and maintain workstations. Configure and maintain routers, switches and local networks to ensure stable connectivity and improved uptime. Maintain asset inventory, perform preventive maintenance and manage backups to reduce downtime. Support development and deployment environments by assisting with environment setup, security basics and routine maintenance.
